

Renewable energy proposals for Sutton Bonington

We want your views on plans for renewable energy generation east of Sutton Bonington.

The proposals are for a solar farm on land between Hungary Lane and Melton Lane, that is currently in agricultural use.

Our plans will generate enough power for around 15,000 homes, at a time when demand is expected to rise.¹

The beating heart of energy.

Indicative site location

Why solar?

Provides a clean energy source.

Helps meet increasing electricity demand.

Makes use of Uniper's great experience in electricity generation.

Who is Uniper?

Uniper is a European energy company with global reach and operations in more than 40 countries.

In the UK, Uniper owns and operates a flexible generation portfolio of six power stations, a fast-cycle gas storage facility, two high pressure gas pipelines and regasification capacity at the Grain LNG terminal in Kent.

An engaged Space community consultation on behalf of Uniper. Powered by Deetu.
