

Press Release  
June 18, 2021

## Georg Oppermann becomes new Uniper corporate spokesman

Georg Oppermann will become Uniper's new Corporate Spokesperson and Head of the External Communication & Sustainability team as of July 1. In this role, he succeeds Leif Erichsen, who, as reported, will leave the company at his own request to pursue new professional challenges.

In his role, Oppermann reports to Fabienne Tweleemann, who has been Head of Corporate Communication & Governmental Relations since April.

In addition to his role as spokesperson, Oppermann's responsibilities include strategic, conceptual, and content-related management of the company's external representation, particularly in the media. One focus will be on sustainability communication.

Oppermann has worked at Uniper and its predecessor companies for more than twenty years, starting his career at PreussenElektra Handel (VEBA) in Hanover as a Market and Competition Analyst. Since 2006, Oppermann has been responsible for the communication management of several key corporate projects: the centralization of the E.ON Group's European energy trading companies in 2008, the integration of E.ON Ruhrgas in 2013, and most recently the successful sale of the business unit Uniper France in 2018. Since the founding of Uniper in 2016, Oppermann has worked for the Düsseldorf-based company as communication manager and spokesman.

**Fabienne Tweleemann says:** "I am delighted that we have been able to recruit Georg Oppermann, a very experienced communication expert from our own ranks, as company spokesman. Georg knows the energy markets as well as the media world and brings with him a large network. He also embodies Uniper and its values very credibly. These are important prerequisites for successfully shaping Uniper's far-reaching transformation with the goal of climate-neutrality in Europe by 2035 and presenting it transparently to the public."

### About Uniper

Uniper is an international energy company with around 12,000 employees in more than 40 countries. The company plans to make its power generation CO<sub>2</sub>-neutral in Europe by 2035. With about 35 GW of installed generation capacity, Uniper is among the largest global power generators. Its main activities include power generation in Europe and Russia as well as global energy trading, including a diversified gas portfolio that makes Uniper one of Europe's leading gas companies. In 2020, Uniper had a gas turnover of more than 220 bcm. Uniper is also a reliable partner for municipalities, public utilities, and industrial companies for developing and implementing innovative, CO<sub>2</sub>-reducing solutions on their way to decarbonizing their activities. As a pioneer in the field of hydrogen, Uniper has set itself the target of operating worldwide along the entire value chain in the future and implementing projects that will make hydrogen the mainstay of the future energy supply.
