Uniper and Woodside sign agreement for LNG supply to Europe

Woodside Energy Trading Singapore Pte Ltd (Woodside) has entered into a flexible long-term sale and purchase agreement (SPA) with Uniper Global Commodities SE (Uniper) for Woodside to supply LNG from its global portfolio into Europe, including Germany, for a term up to 2039, commencing in January 2023.

The quantity of LNG to be supplied under the new SPA is up to twelve cargoes per year (equivalent to more than 0.8 million tonnes per annum or one billion cubic meters of natural gas).

Supply from September 2031 is conditional upon Uniper finalising its long-term strategic capacity bookings in Northwest Europe, expected by March 2023.

Woodside Energy Group CEO Meg O'Neill said about the new agreement built on the company's existing relationship with Uniper: "Woodside is pleased that this latest agreement with Uniper will provide a new source of LNG for consumers in Europe who are seeking alternatives to Russian gas. It also reflects the increasingly interconnected nature of LNG trade in the Atlantic and Pacific basins as global markets respond to energy security challenges."

Uniper Group CEO Klaus-Dieter Maubach: "This agreement secures additional LNG supplies for our customers in Europe, which has become ever more important due to recent developments. It will support our security of supply strategy together with the development of our LNG terminal in Wilhelmshaven. Woodside is one of our biggest LNG suppliers in Asia and we are pleased to extend the cooperation with Woodside to Europe with this deal."

About Woodside Energy

Woodside is a global energy company, proudly Australian with a spirit of innovation and determination. Woodside provides energy that the world needs to heat homes, keep lights on and support industry. The company aims to thrive through the global energy transition with a low-cost, lower-carbon, profitable, resilient and diversified portfolio.

About Uniper

Uniper is a leading international energy company, has around 11,500 employees, and operates in more than 40 countries. The company plans for its power generation business in Europe to be carbon-neutral by 2035. Uniper's roughly 33 GW of installed generation capacity make it one of the world's largest electricity producers. The company's core activities include power generation in Europe and Russia as well as global energy trading and a broad gas portfolio, which makes Uniper one of Europe's leading gas companies. In addition, Uniper is a reliable partner for communities, municipal utilities, and industrial enterprises for planning and implementing innovative, lower-carbon solutions on their decarbonization journey. Uniper is a hydrogen pioneer, is active worldwide along the entire hydrogen value chain, and is conducting projects to make hydrogen a mainstay of the energy supply.

The company is based in Düsseldorf and is one of Germany's largest publicly listed energy supply companies. Together with its main shareholder Fortum, Uniper is also Europe's third-largest producer of zero-carbon energy.
