

Press Release February 19, 2024

Uniper has signed the sale of its gas power plant Gönyű in Hungary

Uniper has entered into a share purchase agreement for the sale of 100 % of the shares in Uniper Hungary Energetikai Kft. to Veolia Invest Hungary Zrt, a subsidiary of Veolia

The power plant has a capacity of around 430 MW and is located in Gönyű, Hungary. It was commissioned in 2011.

Divestment of this participation is part of the remedies Uniper must fulfill under EU state aid law. On December 20th, 2022, the EU Commission approved the stabilization package for Uniper under state aid law. As part of the approval, the EU Commission set out a number of structural remedies that Uniper must fulfil. One of them is the divestment of the gas-fired power plant in Gönyű, Hungary (Uniper Hungary Energetikai Kft.).

Closing of the disposal is subject to various regulatory approvals which are expected to be obtained in H2 2024. Both sides have agreed to maintain confidentiality regarding the financial terms of the transaction.

About Uniper

Düsseldorf-based Uniper is an international energy company with activities in more than 40 countries. The company and its roughly 7,000 employees make an important contribution to supply security in Europe, particularly in its core markets of Germany, the United Kingdom, Sweden, and the Netherlands.

Uniper's operations encompass power generation in Europe, global energy trading, and a broad gas portfolio. Uniper procures gas—including liquefied natural gas (LNG)—and other energy sources on global markets. The company owns and operates gas storage facilities with a total capacity of more than 7 billion cubic meters.

Uniper intends to be completely carbon-neutral by 2040. Uniper aims for its installed power generating capacity to be more than 80% zero-carbon by 2030. To achieve this, the company is transforming its power plants and facilities and investing in flexible, dispatchable power generating units. Uniper is already one of Europe's largest operators of hydropower plants and is helping further expand solar and wind power, which are essential for a more sustainable and secure future. The company is progressively expanding its gas portfolio to include green gases like hydrogen and biomethane and aims to convert to these gases over the long term.

Uniper is a reliable partner for communities, municipal utilities, and industrial enterprises for planning and implementing innovative, lower-carbon solutions on their decarbonization journey. Uniper is a hydrogen pioneer, is active worldwide along the entire hydrogen value chain, and is conducting projects to make hydrogen a mainstay of the energy supply.
