

Power asset governance solutions

Deliver safe, legally compliant, reliable, cost-effective and efficient operations across the life cycle of your assets with our **Asset Governance Solutions** toolkit. This proven toolkit is the core of our internal Quality Management System. Any Asset Management System links together company policies with local laws and operating permits. They enable continuous improvements and people involvement, to ensure excellent asset governance.

Our solutions

We support you in the development of your Management Systems:

- Preparing Certifications Audit
- Develop a plant documentation system
- Set up an Integrated Management System

Secure your compliance by leveraging our services:

- Policy Gap Analysis
- O&M Maturity Assessment
- CO₂ Compliance Consultancy
- Water regulations compliance
- Plant siting and permitting

Benefits

- Sustainable asset operation through legal compliance safeguards the entire life cycle of your asset.
- Increase your company's reputation towards your clients and employees with up to date certifications. An Integrated Management System will enable you to achieve external certificates.
- Maximize the economic value of your asset or portfolio by ensuring a consistent asset governance and strategy approach, using our Asset Governance Solutions.
- Maximize your asset profitability through 'plan-do-check-act' (PDCA) driven improvements of your management policies, processes and procedures.
