

Power plant full scope operation and maintenance

Outsource the operation and maintenance (O&M) of your assets to us. Our **full scope O&M delivery solutions** bundle all the required activities and resources for the operation of your power generation or gas storage assets, aiming to deliver the best commercial value for you while always ensuring a safe and compliant operation.

Uniper leverages all its experience as a recognized world class operator of coal, gas, biomass, CCGT and hydro power generation technologies and gas storage assets to offer full scope O&M delivery solutions.

Our solutions

Through our full scope O&M delivery solutions we will run your assets as our own in order to deliver your desired operational performance adhering to your financial planning.

Our solutions are tailor made to your strategy and risk appetite and will always guarantee:

- A safe working environment for the people working on
- Efficient, effective and compliant operation of the asset.
- Create short-term value by delivering efficient and customized O&M planning for the asset.
- Development of the staff operational capabilities according to the client needs.
- Deliver long-term value by constantly assessing the potential benefits of the implementation of Asset and Portfolio management solutions in order to act ahead of the market.

Benefits

- Minimize your operative risks by relying on a recognized and experienced operator of power generation and gas storage assets.
- Ensure best value for money from asset operation while ensuring a safe, compliant and efficient operation.
- Optimize asset profitability by benefiting from customized solutions for protecting and managing the asset life cycle integrity.
- Reduce the complexity of asset steering by partnering with a one-stop-shop energy solutions provider across the entire value chain and life cycle of the asset.
