

# Together toward a Green Future

We Are Your Partner for  
Renewable Energies

**uni  
per**

# Together for Sustainable and Secure Energy Supply

We want to change the energy world with you. Why? Because we are convinced that a green future can only be achieved together. Climate change affects us all. One of the biggest challenges is decarbonization.

By rapidly expanding renewable solar and wind energy, we want to work in close partnership with you to pave the way toward a carbon-free energy supply.

Benefit from new economic perspectives with us as your partner.

# Are you a Landowner?

**These are the advantages for you as a landowner, forest owner, or local community:**

- We offer attractive leases that provide secure financial income.
- We work with you to unlock the green value of your land and jointly contribute to a clean future.
- We develop solar and wind projects in close cooperation with you.

# Are you a Project Developer?

## **These are the advantages for you as a co-development partner:**

- We offer you our rich experience in the implementation of complex projects along the entire development phase.
- We provide reliable power purchase with our trading expertise.
- We provide technical know-how for plant and grid connection planning.
- We use our experience in hydrogen and battery technology to develop integrated solutions.
- We support you in financing the project and reducing the risk.

# Do you Represent Industrial, Corporate, and Municipal Customers?

**These are the advantages for sustainable value creation:**

- We help to achieve your decarbonization and sustainability goals.
- We offer individual power purchase agreements (PPAs) with individual levels of exposure to electricity price and volume dynamics – including regional PPAs with participation options (utility scale) and guarantees of origin.
- We provide reliable market and risk management on the basis of our comprehensive know-how in the power and commodity markets.

# Strong Partnership

Uniper has set itself the goal of accelerating the energy transition in Europe. That's why we're implementing our steadily growing multi-GW pipeline of solar

and onshore wind projects. In successful cooperation, we will make it happen. Join us and benefit in the long term.

# Strong Successes

## As your reliable partner, we offer:

- A professional and dedicated team.
- Long-standing know-how in the field of supply security.
- Strong experience with off-take contracts, project development, and risk management.
- Tailored solutions for every partner – from landowners and businesses to utilities and developers.
- Close and trustworthy cooperation with local stakeholders.

# Uniper's Growth Is Green

Our ambitions in the field of renewable energies are high.

We work on them every day together with you to achieve our goal of a more sustainable future.

## **We are growing in number every day**

Our team currently consists of more than 80 (as of August 2023) experienced and dedicated colleagues, with the goal of more than doubling it by 2024.

## **We do not stop**

With a four gigawatt project pipeline and at present more than one gigawatt of projects already in development, we are taking decisive steps toward a green future.

## **We are realizing our goals**

In 2023 and 2024, we will bring several hundred megawatts to the investment decision in the solar photovoltaic sector alone.

## **We keep going**

By end of 2026, we will bring around three gigawatts to investment readiness.

## **We are convinced**

Our goal of creating one gigawatt of ready-to-build capacity per year will already be achievable from 2025 onward and a total of ten gigawatts by 2030.
